

LAM VAN DI

FULLSTACK DEVELOPER INTERN

Ho Chi Minh City, Vietnam | 0365933624 | lamvandi11@gmail.com | github.com/diego05

SUMMARY

Software Engineering student at HCMUTE focusing on FullStack Development. Hands-on project experience across frontend and backend. Quick learner, proactive, and comfortable working in team environments with Git-based workflows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, NoSQL, HTML&CSS.

Frameworks: Node.js, React.js, Express.js, Tailwind CSS, HTML5&CSS3.

Core Concepts: RESTful APIs, MVC, SOLID, Design Patterns, JWT/OAuth2.

Database: MySQL, MongoDB, SQL Server, PostgreSQL, Redis.

Tools: Git, Postman, Docker, Swagger, n8n, Cloudinary, VNPay/SePay Integration.

AI Tools: Claude, Antigravity, Cursor, ChatGPT, Copilot, Blackbox.

Libraries & State Management: Redux Toolkit, React Context, Axios, TanStack Query, Mongoose, JWT.

PROJECT

UTEShop

April 2026 — July 2026

Fullstack Developer | Teamsize: 4

github.com/diego05/Nhom02_DoAnCNPMM

- **Description:** A comprehensive multi-vendor e-commerce ecosystem featuring a closed-loop cash flow system that seamlessly connects customers, vendors, shippers, and administrators.
- **Technologies:** React.js, TypeScript, Node.js, Express.js, Tailwind CSS, HTML5&CSS3, MySQL (Sequelize), Redis, Cloudinary, Git, Postman.
- **Backend:** Engineered a scalable system architecture by developing RESTful APIs with Node.js/Express.js, optimizing relational data models using MySQL, and implementing Redis for caching.
- **Frontend:** Built a dynamic, highly responsive single-page application using React.js and Tailwind CSS, utilizing TanStack Query to optimize data fetching and rendering.
- **System Integrations:** Successfully integrated 3rd-party services including VNPay for secure online payments, VietQR for automated vendor bank withdrawals, and Cloudinary for media storage.
- **State Management & Features:** Developed comprehensive management dashboards (Admin/Vendor) and a real-time shopping cart system, utilizing Redux Toolkit for efficient global state management.
- **Workflow Optimization:** Streamlined team development and testing processes by utilizing Postman for API verification and Git/GitHub for source code version control.

EDUCATION

Bachelor of Information Technology

Ho Chi Minh City University of Technology and Engineering

2023 — 2027 (Expected)

GPA: 3.2

ADDITIONAL INFORMATION

Languages: English

Certificates: TOEIC 725/990
